SPACE SCIENCE BOARD

October 3, 1962

Dr. Joshua Lederberg
Department of Genetics
School of Medicine
Stanford University
Palo Alto, California

Dear Joshua:

In recent discussions with Dr. Lambertsen about the composition of the Man in Space Committee and the rather formidable list of members, liaison representatives, etc. now associated with this group, it seemed that we might present a truer picture of the size of the Committee if we were to make a distinction between active members and ex officio or liaison members. We felt sure that you would have no objection^{*} to being listed as a liaison representative of the Exobiology Committee and therefore would like to make this adjustment.

Dr. Lambertsen still urgently requests your active participation in the activities of the Man in Space Committee and hopes that it will be possible for you to continue to play a major role in its work.

Very best regards-- Sincerely yours,

George
